
PK	Primary key	**1**	Exactly one
FK	Foreign key (or component)	**0..1**	Optional one
UQ	Single-column unique key	**0..N**	Zero or many
?	Nullable attribute	**Dashed**	Defined in another figure

Selected attributes and relationships; additional context FKs and journals are omitted.

Figure 7. Entity-Relationship Diagram for Class Preparation

One valid enrollment per learner and school year; voided records remain as evidence.
Section placement also checks year and grade. An adviser may be unassigned.
Movement events are original history; correction and identity journals are omitted.

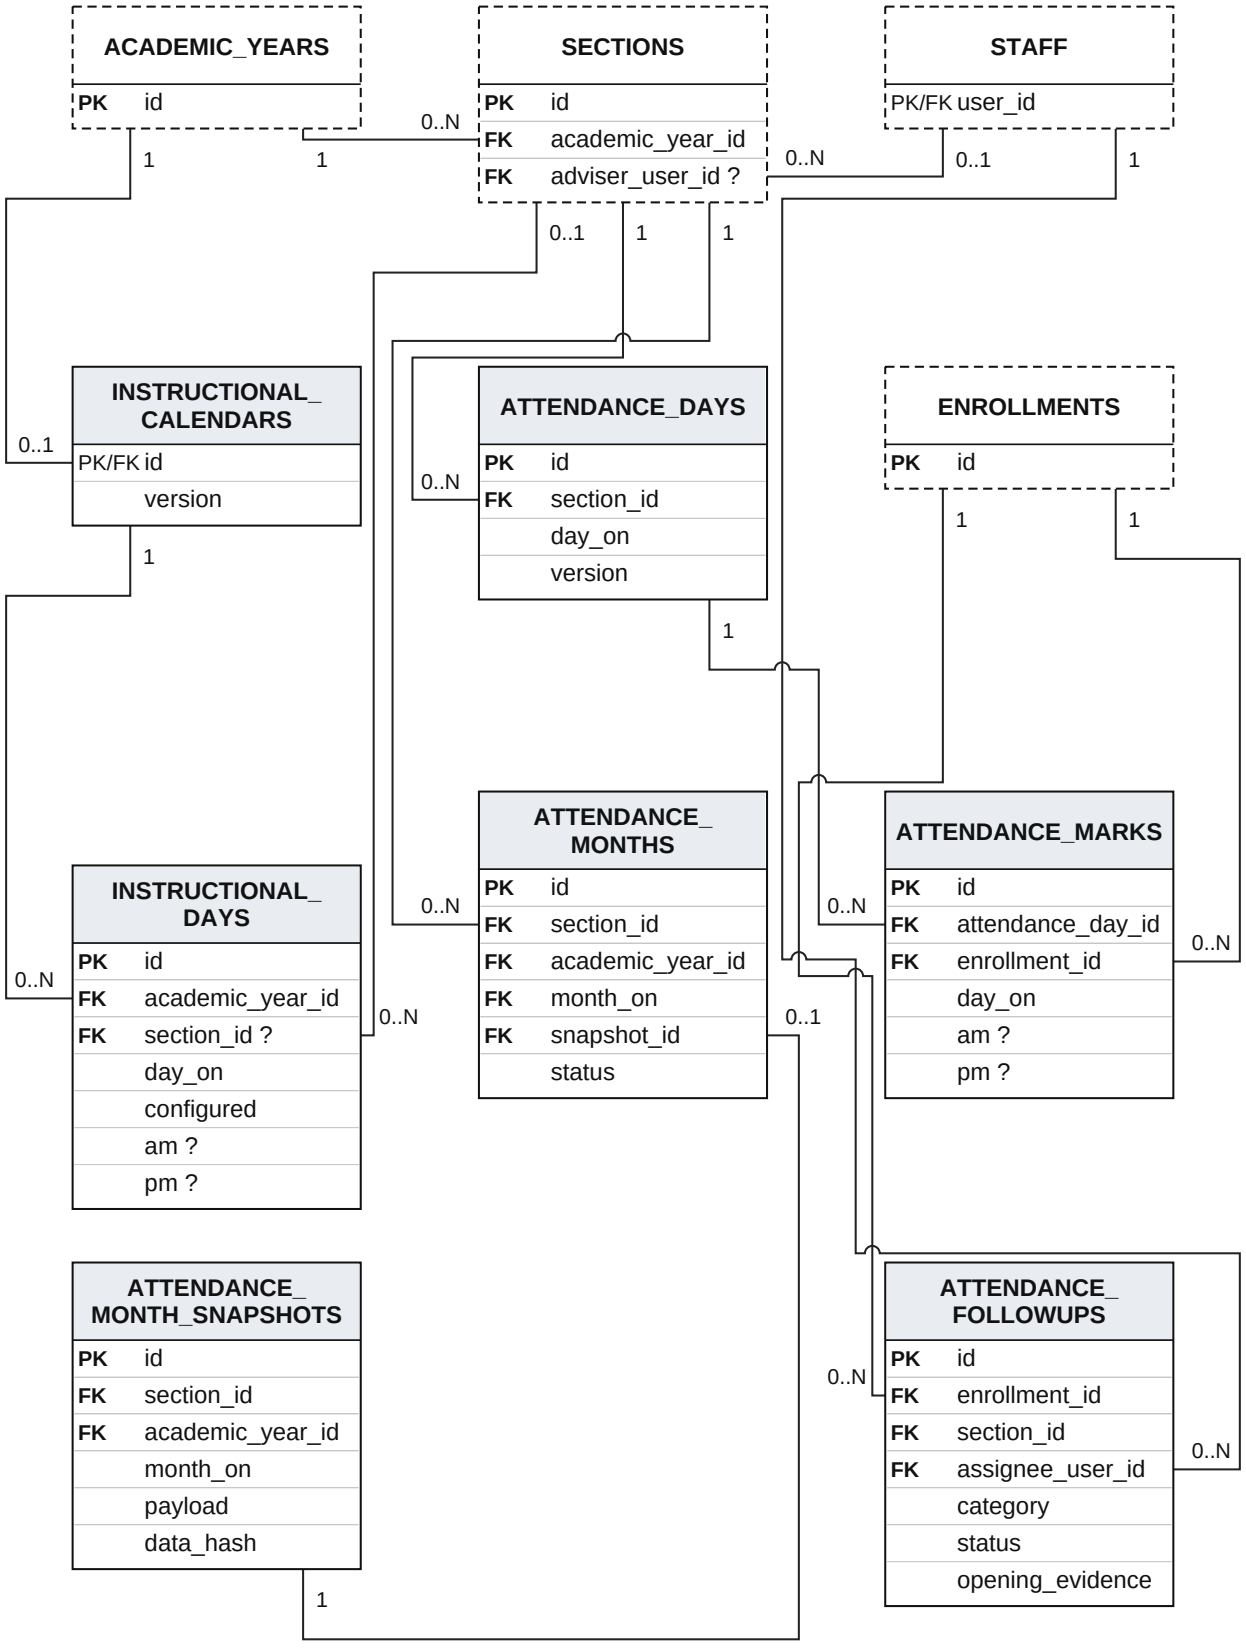

Figure 8. Entity-Relationship Diagram for Attendance Record

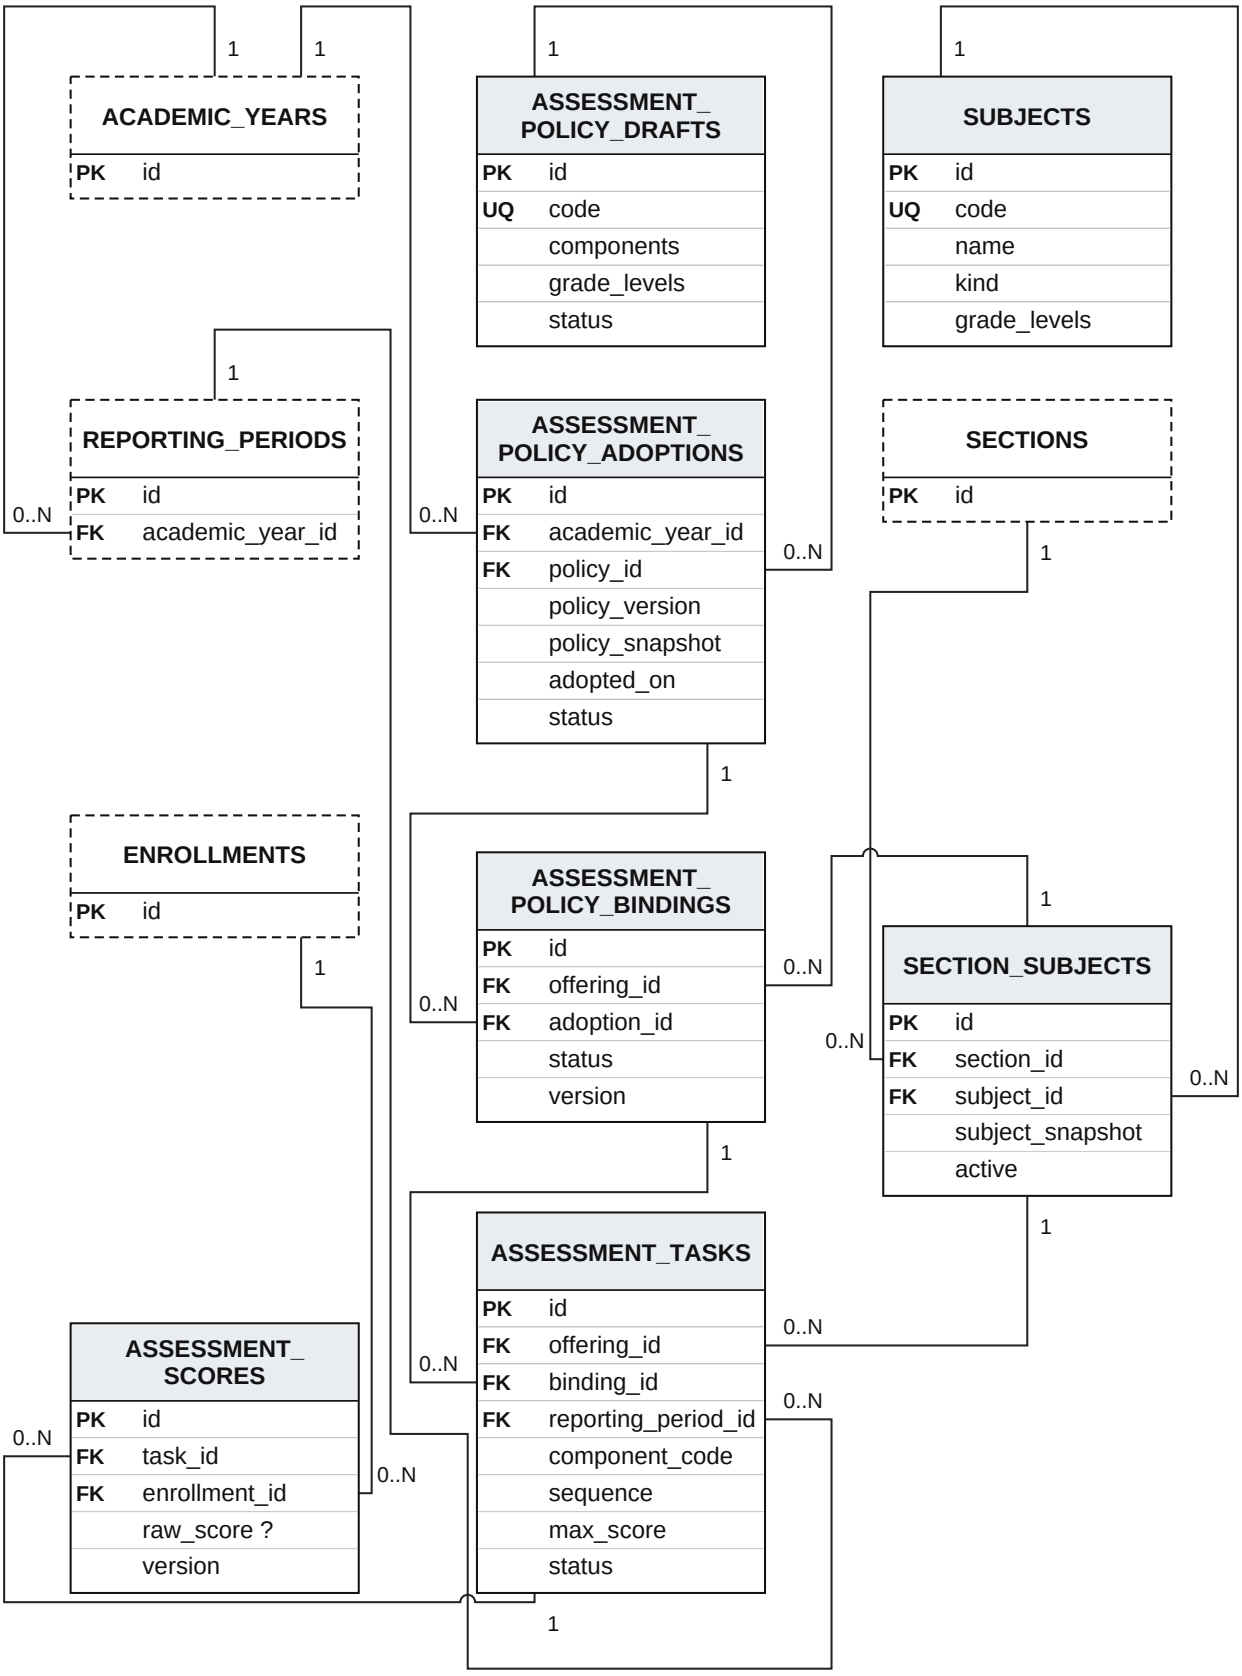
No configured date means unknown; a null AM/PM mark means not recorded.
A saved month references one snapshot. Before first submission, its draft is virtual.
Follow-ups are manual. Official attendance credits and automatic alerts remain gated.



PK	Primary key	**1**	Exactly one
FK	Foreign key (or component)	**0..1**	Optional one
UQ	Single-column unique key	**0..N**	Zero or many
?	Nullable attribute	**Dashed**	Defined in another figure

Selected attributes and relationships; additional context FKs and journals are omitted.

Figure 9. Entity-Relationship Diagram for Academic Record

An offering may retain many bindings; at most one is currently bound.
Adoption and subject snapshots preserve the selected revisions.
Only raw scores are stored. Null is unrecorded; no grade is computed.
